

## Business Process Modelling (case Study project)

**Business Case Description** : I am the owner of one Yoga Studio. I recently purchased it and entered in this yoga industry. I have my place but Currently looking for few Yoga Teachers for training. I recently started my studio. I also have ready setup for online yoga sessions with ready studio website. I don't have any training Yoga teacher.

Generating Business Case about searching good Yoga teacher for my new Yoga Studio.

**NAME : *IGNITE YOGA STUDIO***

### REQUIREMENT ELICITATION AND GATHERING PHASE

Stage 1. Understanding Business requirements and Business Boundaries.

**Question 1 : What are the products and Services offered by Business ?**

Answer : My Business is a yoga studio named as "Ignite Yoga Studio". We offer all kind of yoga training and guidance for competitive yoga tournaments. We are specialized in modern yoga training with traditional yoga methodologies. We run both the services such as In-studio Group Classes membership based classes and online website based classes supplemented by Digital services like live video classes, recorded subscription based classes.

**Question 2 : Who are your Target Customers ?**

Answer : We are looking for Yoga teachers to guide and train young yoga enthusiasts as well as competitive oriented Athletes.

#### Requirements

1. Basic Age range : 25 to 50
2. Minimum required experience of 2-3 years in yoga industry.
3. Yoga professional training certificate mandatory.
4. Competitive Yoga participated Athlete is preferred for competitive yoga training.
5. Yoga teachers for online batches and have previous experience of online yoga teaching.
6. Strong Communication and Customer service Skills.
7. Flexibility with Scheduling.

**Question 3 : What are your Strategic Goals ?**

Answer : The strategic goals are centered on achieving local market leadership as the premium, modern yoga studio known for exceptional, high-energy classes and community. This is supported by an internal focus on building a team of highly skilled, certified teachers who will drive the eventual goal of becoming the most trusted and scalable online yoga training service across the country.

**Question 4 : Status of the Business**

Answer : The business is a small, bootstrapped startup that has successfully completed its foundational phase, including the acquisition and setup of the physical studio and the deployment of a fully integrated online platform. The current operational status is focused entirely on the critical talent acquisition effort to secure the initial team of skilled teachers necessary to launch the class schedule and transition to active revenue generation.

**Question 5 : Current Status in the market ?**

Answer : The studio is entering a highly competitive market but is positioned to capitalize on strong growth trends in digital and boutique fitness. Our primary advantage is the hybrid model: we blend the high energy and premium experience of the physical studio with a ready-made, scalable online platform. This allows us to compete locally against traditional studios while simultaneously targeting a national subscriber base for scalable growth.

### STAKEHOLDER IDENTIFICATION AND MANAGEMENT STAGE

## Business Process Modelling (case Study project)

Stage 2 : Building Business Process for My Business model where, I try to list down all the participating and required stakeholders in this recruitment stage for my yoga teachers. It will primarily include;

1. HR Team for recruitment process and documentations.
2. Analysis expert team which will analyze all the resumes and their truthfulness.
3. Actual Candidates Who are coming for an interview.
4. Legal Advisor
5. Management Team and Studio owner (CEO)

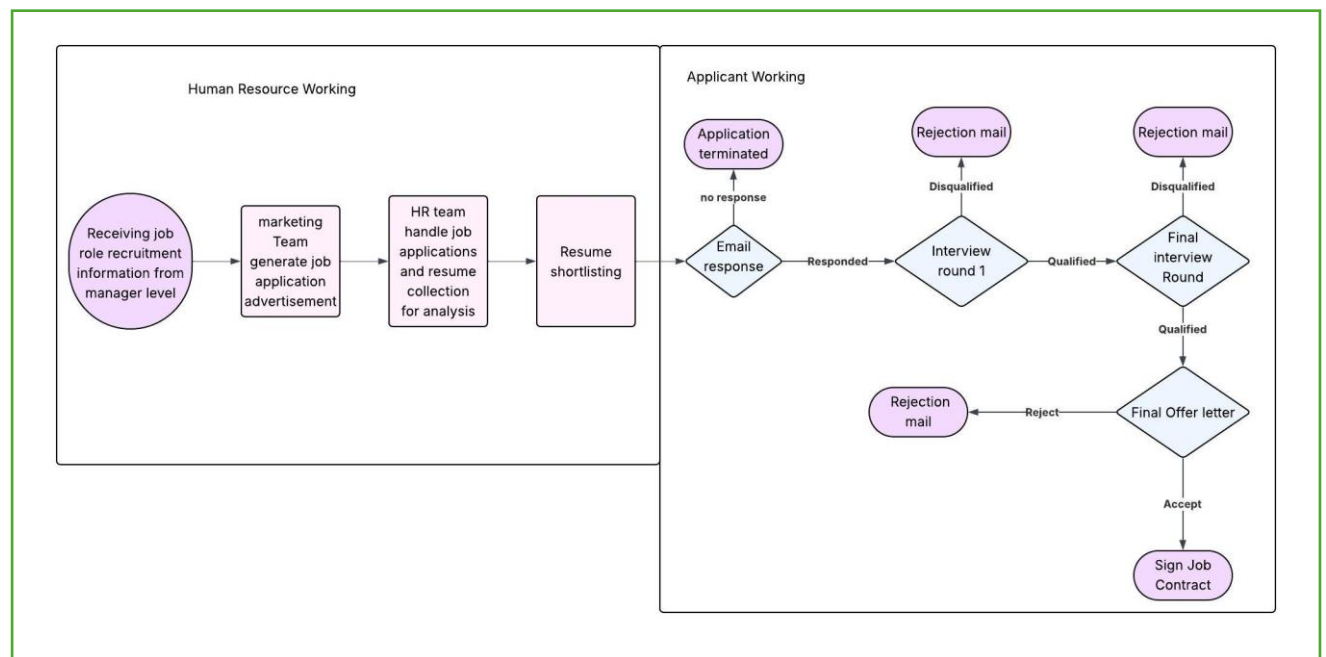

### PROCESS MODEL GENERATION STAGE

Stage 3 : This stage is called as the process modelling stage, where we can make model or flowchart of entire business model which helps non-technical or shareholders to understand the path of operation for the project. For this purpose, we used LUCIDCHART which is open-source business process modelling software where we can take template suitable for our business flow and can generate the required process flow easily.

We need to first decide the path flow of entire process.

Path flow for yoga studio teacher recruitment process is as follows;

1. Process starts from Receiving vacancy information from manager level (internal level)
2. Manager tells marketing team to generate advertisements for the job role.
3. Job of the HR team to handle all the job enquiries perfectly and collecting their resume for analysis.
4. Then Analysis team will analyze all the resumes and shortlist some resumes suitable to the job role.
5. For suitable candidates Interviews are scheduled for the applicants.
6. If applicant qualifies the first round of interview, HR sends mail to the candidate to be ready for their second round of interview.
7. If applicant pass the second round of the interview, that particular candidate will be accepted for the job role.
8. Those candidates who are not selectee or unable to qualify interview rounds, HR will mail them about rejection and their application process gets terminated.

## Business Process Modelling (case Study project)

Now we need to write Goal of this process as per our understanding.

Goal : The primary goal of this end-to-end recruitment process is to efficiently and systematically fill the open Yoga Teacher positions with the most highly qualified and certified candidates who align with the studio's modern and energetic brand culture. This is achieved through a structured, multi-stage funnel that moves from initial application and resume analysis through two rounds of interviews to culminate in the signing of a final job contract.

Now we need to mention some points of improvement in this generated process.

1. We can conduct separate interviews for different job roles like General trainee, Athlete coach and online expert etc. It will help to conduct interviews as per requirements of these positions.
2. Interview rounds should be more descriptive and specific such as round 1 can be Practice teaching Audition kind of a round and round 2 can be Role specific interview where we can arrange industry experts for those interview rounds.
3. Resume shortlisting methods can also be classified as initial mandatory resume analysis phase and second can be digital portfolio review where we can ask them to attach clip of their teaching skills and methodologies.
4. Email responses to candidates can be made more accurate and on time. Candidates should receive Emails with accurate reason and decision with minimum delaying and in structured manner.
5. We should keep another reviewing window after offering offer letter to any candidate just to verify originality in the documents and contract legal workings.

### ROOT CAUSE ANALYSIS :

Problem : There is only one human representative in my yoga studio responsible for the recruitment process. Accordingly, the process is taking too long to complete and your need for yoga teachers persists.
